HISTORY

REV	date	p.i.c	check	approval	page	Comment
1.00.00	17-Mar-10	machida	yanoguchi		ALL	First issue.

It is assumed that a difference with the last release is in the red.

Biginning

This list is common in RS232C and IPcontrol.

VSX-31 and VSX-30 correspond to RS232C only.

About Network Standby
This setting allows the IP Control function
for operating the receiver from a IP control system connected on the same LAN
as the receiver to be used even when the receiver is in the standby mode.
1. Select ‘Network Standby’ from the Network Setup menu.
2. Then set to "ON".

RS232C Physical Connection

Connector

RS232C DB9 Male, Cross

Pin	AV Receiver
1	*1
2	RXD
3	TXD
4	*1
5	GND
6	*1
7	RTS(BUSY)
8	NC
9	NC

*1 Pin 1&4&6 are shorted each other.

Communication

Communication Speed : 9600bps
Character length:8bits
Parity:None
Start bit:1bits
Stop bit:1bit

Ethernet

Communication port

TCP Port 23

Notice

Notice1

This equipment save the power consumption (less than 1W) during the standby mode.
To achieve this, main CPU doesn't operate during standby mode.
For this reason, this equipment can not receive the 1st command from rs-232c port.
But main CPU will be waked up by this 1st command.
This equipment is using 1st command "<CR>" as only a trigger to wake up the main CPU
and can not decode 1st command.
Please send command as bellow.
Please make sure to have at least 100msec. Interval between the 1st command and the second command.

```
<CR>           <CR>           <CR>
  ↓              ↓              ↓
100msec Wait   100msec Wait   100msec Wait
  ↓              ↓              ↓
<CR>PO<CR>     <CR>APO<CR>    <CR>BPO<CR>
```

```
<CR>           <CR>           <CR>           <CR>
  ↓              ↓              ↓              ↓
100msec Wait   100msec Wait   100msec Wait   100msec Wait
  ↓              ↓              ↓              ↓
<CR>?P<CR>     <CR>?AP<CR>    <CR>?BP<CR>    <CR>AMX<CR>
```

Notice2

It may happen to take time for the set product to respond to the command from your remote controlling system.

Notice3

After set to PANEL LOCK or REMOTE LOCK mode,
"PANEL LOCK" or "REMOTE LOCK" message appear on FL display
when a front panel key or remote control button pushed.

A/V Receiver Control Commands List

AMX Device Discovery (for RS232C)

"AMX" command is a RS232C Control Command.

Command	Response
AMX<CR>	AMXB<-SDKClass=Receiver><-Make=Pioneer><-Model=modelname><-Revision=1.0.0><CR>
