Description:
Dear KDE Folks,

I have the pleasure to announce the new phase of Crystal Icon Theme that from now on will be called Crystal Clear. There are a lot of changes! Hundreds of new icons, support to the most known KDE games, and a lot of new things. The design style also was improved and updated to be more competitive with the market operational systems as well as the upcoming systems. I hope you like it!

As always I would like to thank some important people:

1- All the KDE users that always have supported my work and make my working nights really worth.
2- Linspire for the financial support of this project (you may not believe, but I have to eat so I keep living).
3- Nullmid, RELIO owner that kindly host online my projects.
4- God, for have gave me life and make all things possible.

Everaldo

Changelog:
1- remove Linspire elements
2- add Mozilla Theme
3- add Style Decoration

Kicker icons
by cseaton on: 01/31/2006, 0:30

I love the crystal clear theme, but one thing that annoys me is that the icons don't look right on a small sized kicker. The theme automatically uses the 16x16 icons instead of the 22x22 which would look much better (especially since the system tray uses larger icons still). Is this a bug in the theme, or is there a way to force it to use the larger icons when using a small kicker?

How to install
by dipankarbd on: 02/15/2006, 11:12

I use linux Fedora core-4.

How can i install "Clear Style Decoration" in my linux.

please help me..

i'm sorry but...
by bushwakko on: 02/28/2006, 20:11

...there is no god! :P

the theme was nice though.

windeco
by bushwakko on: 03/01/2006, 23:04

I think it's weird that the windeco hasn't gotten it's own entry here at kde-look.org! Also, I had a hard time finding and downloading the windeco, and when I did, it didn't look ANYTHING like the screenshot :/

Help!
